

ShoreStation®

The original since 1959

SHOREBRIDGE DOCK SYSTEM

Why ShoreStation?

Sure it looks great, but a dock is about more than just style - it also has to be safe, smart and easy to maintain. The difference here is in the details...

Your dock is the heart of your lake home.

It has to stand up to the daily punishment of boats, rough water, the sun, the kids - you name it. It has to do all this and stay trouble-free, so you can relax and focus on more important things... like where the dog hid your flip-flops.

That's the essence of lakefront living. That's why ShoreStation.

Peace of Mind

Since 1959, the ShoreStation name has stood for rugged, dependable waterfront equipment. Rest assured that these products are designed for the long haul and backed by one of the best warranties in the business.

More Time to Play

Corrosion resistant powder-coat painted aluminum deck planks and frame. Heavy-duty aluminum leg frames and extensions. Heavy-duty poly wheel. Stainless steel fasteners. Everything is built with minimum maintenance in mind so you have more time to play.

All ShoreStation products come with one of the best warranties in the business

For more information contact your local dealer.

Safe For Everyone

Your dock needs to be safe and enjoyable for everyone. To make that happen you've got to have the details right, like the narrow width and sturdy handrails on this Aqua Step. It provides a safe route in and out of the water for kids, seniors, and dogs.

Accessories Galore

Go ahead - express yourself! The wide variety of accessories make it easy to get creative and customize your layout. From functional items like lights to a bench - they're all designed to look right, fit right and work right. That's because they're all Genuine ShoreStation!

Easy Installation

Listen up all you "do-it-yourselfers"...

With lightweight frames and 2' x 4' drop-in deck sections, two people can easily assemble an entire dock layout. The 4'x8' and 4'x16' dock sections and optional screw-adjust leg mean fewer parts for faster installation without entering the water.

Versatility for the Way You Live

Your dock has to be able to grow and adapt to fit your lifestyle. The modular design of Genuine ShoreStation allows you to add sections side-by-side or expand to form "T"s, "L"s or side platforms. The miter corner and ability to mix and match support legs allows you even more customization.

Looks Do Matter

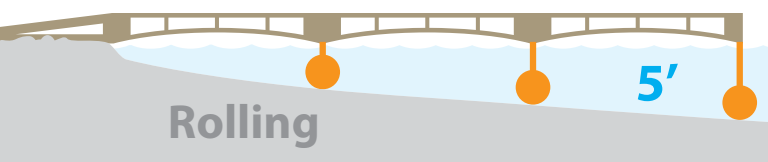

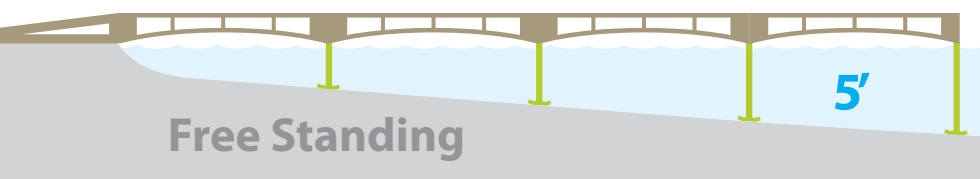

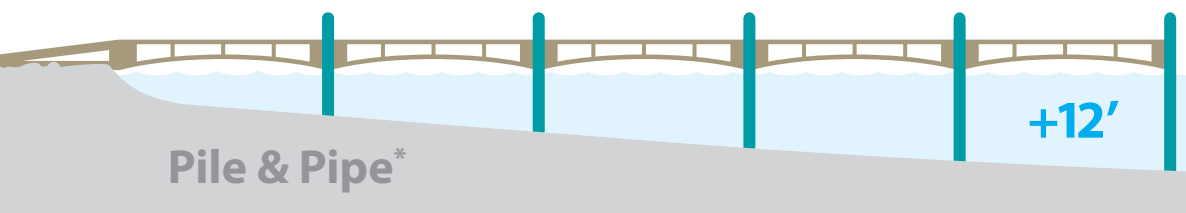

Okay, admit it - you have cruised around the lake checking out your neighbors' homes. You understand how a nice looking dock can make or break your lakefront. The ShoreBridge's attractive caramel-beige arch truss design isn't your typical looking dock. The refined appearance features complimentary sand-beige decking and color-matched accessories for a look that never goes out of style.

Stability = Safety

Flimsy, unstable dock can be a real hazard, so play it safe with rock-solid Genuine ShoreStation Dock. The strong, but lightweight aluminum arch truss design assures high strength and stability for a lifetime of service. Its 2" x 2" extruded aluminum is reinforced with crossbars. The 2'x4' drop-in decking locks into place for additional support and rigidity.

1 Choose Your LEG STYLE

ShoreBridge dock sections feature an attractive caramel-beige powder paint arch truss design with lightweight 2' x 4' aluminum deck sections. The drop-in decking is reinforced with 3 crossmembers and locks into place for additional support and rigidity. It is coated with durable sand-beige, powder paint. This non-skid finish is cool to the touch and best of all there are no splinters, no sharp edges, and no nails.

**Rolling****Free Standing****Pile & Pipe***

*Actual installations may vary, consult a qualified ShoreStation dealer for proper application. Depth for Pile and pipe varies 8' for Pile and +12' for Pipe.

Selecting the Leg Style to Fit Your Lakefront

Selecting the support style to fit your lakefront ShoreBridge Dock is available with your choice of roll-in, free-standing or pile & pipe support. You may even mix and match to get the best fit for your lakefront.

**Roll-In****+ Advantages**

Roll-in Dock Support offers the ultimate in easy installation for lakes with smooth, gradually sloping shorelines.

With wheels that allow it to be assembled on shore and then rolled in and out of the lake.

The screw-adjust legs allow for easy adjustment without getting into the water. The various leg frame and extension leg combinations allow it to work in water up to 5' deep.

🔧 How it Installs

Rolling Dock can be assembled on shore and rolled into the lake as a unit. The sections are held together by self-aligning pivoting connectors. Leg height can be adjusted with hand powered drill or optional speed wrench without entering the water.

**Free-Standing****+ Advantages**

Free-standing Dock Supports are perfect for almost any type of lakefront.

The foot pads on each of the legs simply rest on the lake bottom allowing the dock to work in difficult situations such as steep drop-offs and rocky, uneven bottoms

The screw-adjust legs allow for easy adjustment without getting into the water. The various leg frame and extension leg combinations allow it to work in water up to 5' deep.

🔧 How it Installs

Free-standing Dock is installed and removed one section at a time. The sections are held together by self-aligning pivoting connectors. Leg height can be adjusted by a hand powered drill or speed wrench for the screw-adjust legs without entering the water.

**Pile & Pipe****+ Advantages**

Pile & Pipe Supports are perfect for deep water applications where the bottom is not too rocky, yet solid enough to be load-bearing.

Choose from mounting brackets for 1.5" pipe legs or 4x4 wood piles.

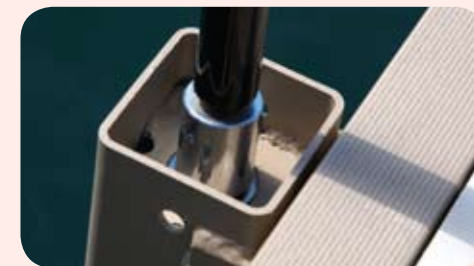

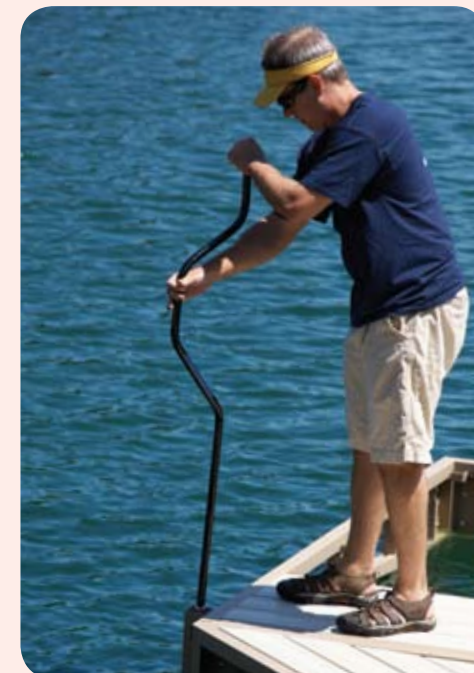

🔧 How it Installs

Pile & Pipe Dock is installed and removed one section at a time once the posts have been driven into the lake bottom.

The sections are held together by self-aligning pivoting connectors.

Adjust on the fly and stay dry!

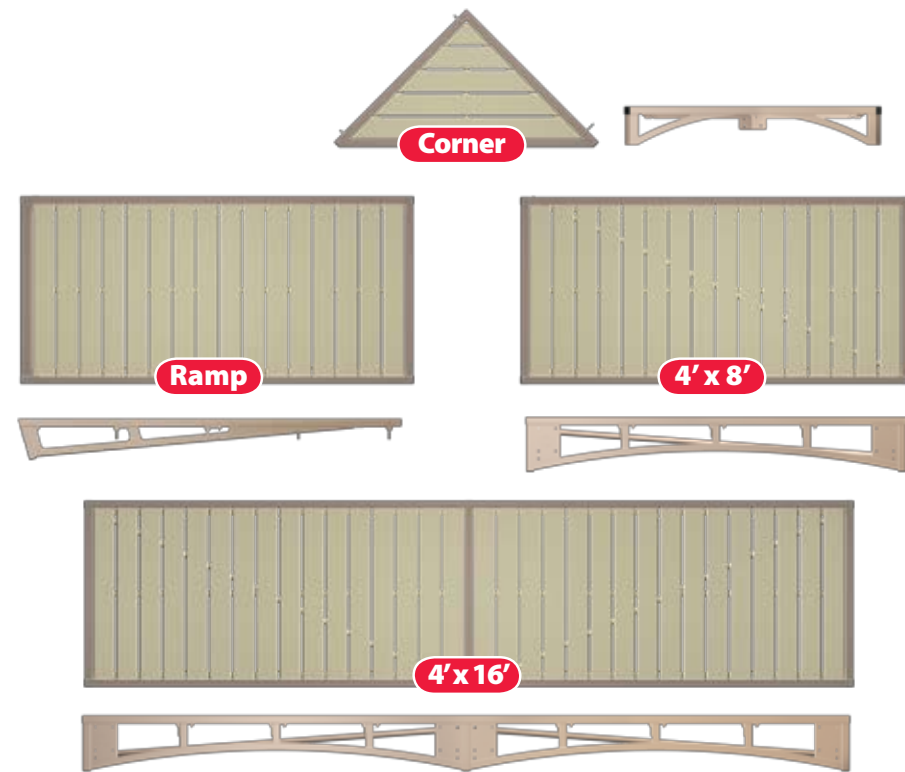

A hand powered drill or optional speed wrench allows quick height adjustment for different depths or changing water levels. Adjustments are easily made without ever stepping into the water.

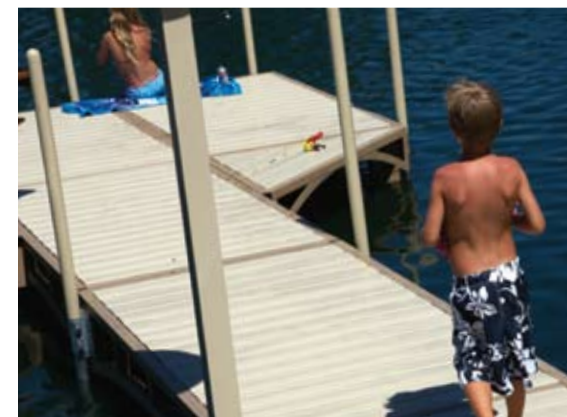

2 Choose Your **LAYOUT**

The modular design makes it easy to create different layout options. These unique features will help you get creative!

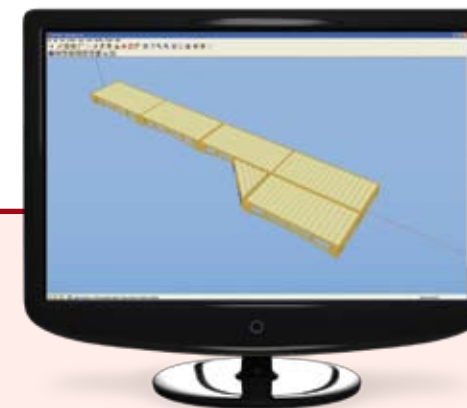

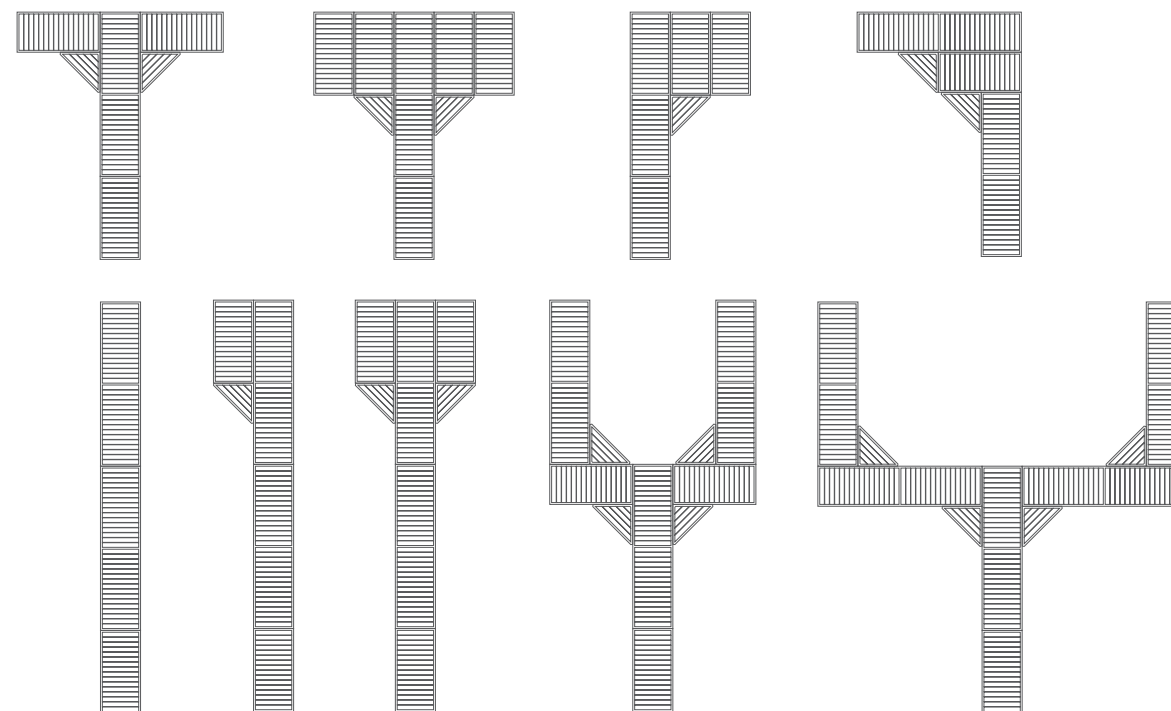

Commercial Layouts

Genuine ShoreBridge Dock works great for larger commercial layouts too. The clean, professional appearance is perfect for marinas and condominiums, and guests love all the user-friendly accessories.

From **simple** to **sophisticated**
- the **options** are **endless!**

Design Your Custom Layout Online

Our 3-D Lakefront Layout tool walks you through the process of designing your dock. Start with a few sections, then add accessories, boat lifts, you name it! It's easy to use and free. Your ShoreStation dealer can show you how it works or check it out anytime at ShoreStation.com.

3 Choose Your ACCESSORIES

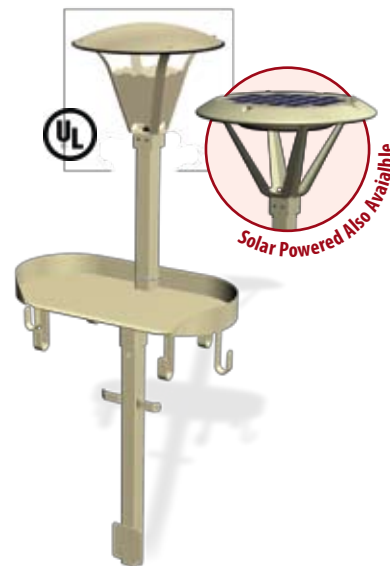

One of the most popular features of the Genuine ShoreStation Dock is the wide variety of accessories. Constructed of the finest materials, these accessories are specially designed to be useful, as well as compliment the beautiful appearance of your dock. From ladders and dock bumpers to our stylish EON Bench, they're all here and they're all Genuine ShoreStation.

**Dock Bumper**

Big enough to protect your craft above and below the water line, these bumpers install just about anywhere on your dock. They are durable, yet flexible to absorb repeated shocks. Available in bolt-on or screw leg.

**Dock Ladder**

This maintenance-free aluminum ladder features a textured powder-coat finish that provides better traction and is cooler to the touch than steel or wood. The snap button adjusting mechanism allows it to be raised or lowered in seconds, without tools.

**Gear Tower w/Light**

This combination of gear tower and dock light is a bright idea because it keeps your dock clean and organized, while the party continues into the night! The large table top is perfect for drinks, a radio, or even for cleaning fish. Life jackets, tow ropes, and towels hang neatly on the heavy-duty storage hooks. Besides, you'll want to be organized when so many people are visiting to admire your dock! Available in UL listed AC powered or solar powered. (Gear tower and light sold separately)

**Solar Dock Light**

Our new solar version of the popular dock light. The top mounted solar panel, maintenance free battery, and programmable solar charging controller are all self-contained in the Dock Light making it simply brilliant- in many ways! It shines much brighter than solar lights you're used to seeing. In fact, it emits as much light as a 60-watt bulb. And it's all powered thanks to the hi-tech solar panel, which means no wiring, no expense, no worries! Move it wherever you need light.

**Fun for Ages**

Eon Marine® is a unique, 100% synthetic material that offers the beauty of natural wood, without all the maintenance. It is resistant to heat, cold, mold, mildew, UV rays, and insects, so it stands the test of time.

**Eon Marine® Swivel Chair**

Ideal for fishing or just keeping an eye on the kids. Constructed of beautiful Eon material to match your dock, this 22" wide chair features 360° swivel action and built-in cup holders. The maintenance-free Eon® material will not splinter or rot and will look like new for years to come.

**Eon Marine® Bench**

A cozy bench built for two. This 42" wide bench is constructed of beautiful Eon material and features built-in cup holders. The maintenance-free Eon® material will not splinter or rot and will look like new for years to come.

**Aqua Step**

This narrow version of our popular ShoreSteps is the easiest way in and out of the water. The narrow width and sturdy hand rails make it perfect for kids, seniors and even the family dog. The adjustable parallelogram design allows it to fit a variety of dock heights. Now with maintenance-free aluminum steps.

**Shore Steps**

Create a stylish and safe entryway to your dock with the matching Shore Steps. Available in your choice of 5 or 8-step configurations, ShoreSteps feature maintenance-free aluminum steps and an adjustable parallelogram design to fit a variety of inclines. Just like our dock, these steps are specially designed

Easy Does It!

Engineered to minimize headaches and maximize your play time.

Putting it all TOGETHER Do-it-yourselfers and professional dock installers agree – ShoreStation ShoreBridge Dock’s versatility makes customized installations a breeze.

Section Assembly

Simply attach the frames together with the self-aligning pivoting connector.

By quickly setting two bolts, the section joints are able to flex during installation.

Easy Installation

Roll-in is by far the easiest installation. Gradual sloping shorelines with minor obstructions and the lightweight aluminum construction on wheels allows the installer to simply roll the dock in the water.

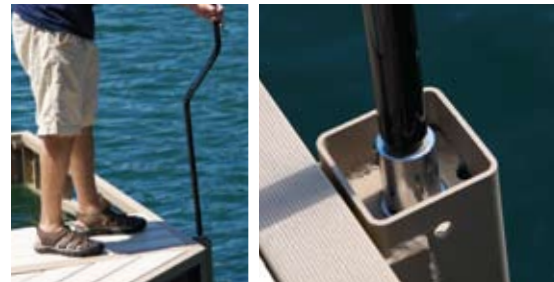

To simplify the installation of the free standing, pile, or pipe supports we have developed a unique float kit. The float kit attaches to the dock frame allowing the installer to float the section into place until the support system is installed.

Once the frame sections are positioned, it's time to add the deck. The lightweight, easy-to-handle 2'x4' drop-in deck sections lock into place with spring snaps, no tools needed.

Adjusting & Leveling

The roll-in and free-standing support systems feature screw-adjust legs allowing for quick height adjustment for different depths or changing water levels. Adjustments are easily made without ever stepping into the water.

Dock Removal

The hitch kit makes removing your roll-in dock a breeze with an ATV, truck or tractor. It discretely bolts to the inside of the frame. The tongue can be removed when not in use.
